SECURITY IMPACT

Title of Change - Modification of the SVTS MLV Telephone

25X1

Change Proposal Number - SITE (ALL)-ECP-88-3

25X1

(U) This proposal was reviewed by the Network Certification Working Group on 17 January 1989. The following specific comments are provided.

(S) Proposal is to eliminate the logon for the Multiline Voice Telephone (MLVT).

Comment - CONCUR - It is our position that the MLVT can be separated from the Secure Video Teleconferencing System (SVTS) and treated as a telecommunications device. Therefore, since it is afforded physical protection like other secure phones, it does not require a logon. However, use of the MLVT external port should continue to be allocated through the User Control Terminal which does require logon.
